Routine Notes.

WD 07111—GPB—50,000—29-7-44

[To be used only for notes, requisitions, etc., not intended for permanent record.]

Letter no C.C. 134/43 - III dt 17/1/45 from the Deputy Commr, Shimoga stating that Rr Nagaraja of Hindustan Aircraft had approached him in connection with the purchase of land near Khodarwathi for installing a wood works plant.

1) Submd for perusal.

The Dy Commr in his letter refers to the previous correspondence relating to the negotiations of Rr Nagaraja for purchase of land near Khodarwathi. The concerned file has been sent n.o. to the Commr for I + D) + plan vide remarks (Dy no 2321) & he has been reminded repeatedly for the return of the file

2) Rr Nagaraja has recently put forth proposals to put up a wood works industry near Khodarwathi. The land is perhaps now required by him for this industry. The C. C. F has been consulted n/o on 13-1-45 (Dy no 3979) on ~~Rr Nagaraja's~~ proposals. This may be awaited as also the file referred to in para 1 above

Submd for Orders

19/1/45

CS/1

N.B.— Should routine notes be written on small slips, the notes must be copied, or slips pasted on this form.

Mr William Nagg's proposal to start a wood working industry 3979

No. 38/44-45 dated 27/1/45 } 9th 373-44

9) Retransmitted with compliments.

10) The idea of starting a concern of this kind is good and perhaps deserves encouragement. If the proposer desires no concessions or help from Government he can be allowed to proceed.

11) The location of the factory at Bhadravati is not in my opinion suitable for obtaining timber which is the chief raw-material needed by the concerns. The outturn of Bhadravati Division in timber is easily saleable and the Company will have to compete with many others in securing its supplies.

12) For supply of charcoal to the Mysore Iron and Steel Works no factory at Bhadravati is needed. The Company can take up contracts without a Factory at Bhadravati.

13) Sleeper manufacture has to be at the Forest as otherwise it will be a costly proposition to do it from a central Factory.

14) It would be mutually advantageous if the company can take out a lease of Forests at Govardhanagiri where they can work for country craft, packing crates, furniture etc. They would be within easy reach of a port also. There is, however, no electric power now that side; but this difficulty can perhaps be overcome by having a steam generating uni

Chief Conservator of Forests.
25/1

To

The Secretary to the Government
of Mysore, Development Department,
Bangalore.

Mr Nagy's proposal to start a wood working industry near Bhadravathi

9 pc 373 of 1941 3979 of 1941

Letter no C.23 dt 14-1-42 from the Chief Electrical Engineer stating that power to the extent of 120 k.W. could be made available to the proposed Co & that Mr Nagy may be asked to approach him direct with regard to the details of arranging supply

15 Submitted with note to the minutes of the Minister at para 1 above. The W.O note from the C.C.F (paras 10-14) and the letter from the Chief Electrical Engineer are for perusal.

16 Re the starving of the industry the C.C.F has stated that it may be given encouragement. Mr Nagy has not asked for any such concessions for the present, in this letter dt 28-12-41 except that it may be classed as a war industry (vide fl 7). A report has been rec'd from the Deputy Commr Shimoga that Mr Nagy had discussed with him re: certain lands required for a timber & a wood works plant. (fl 11) Mr Nagy has not asked for any concessions of land in this letter under disposal.

17 The Chief Electrical Engineer has stated that power to the extent of 120 k.W may be made available to this industry & that Mr Nagy could contact him for details re: supply.

18 Submitted for Orders — Refer paras 11 & 12 of the note

18) It is for Consideration if Mr Napy may be asked to state specifically what assistance he wants from Govt in this connection. It is perhaps not necessary to take up the scheme by Govt. Mr Napy may also be asked to get into touch with the C.E.E regarding his requirements of electric power, so that he may be in a position to make specific proposals to Govt. It is for Consideration if the suggestions of the CCI contained in para 11 supra be communicated to Mr Napy.

My dear Vedavyasacharya,

I am desired to say that it is understood that Mr. Nagy, an American employee of the Hindustan Aircraft Factory and residing at 9 South End Road, Basavangudi, has been in communication with persons in Shimoga with a view to purchasing land adjacent to Sagar Railway Station. The Hon'ble the Resident would be grateful to know whether the Government of Mysore have any information regarding this transaction.

Yours sincerely,
A. R. Dorai

V. Vedavyasacharya Esq., BA.,
Chief Secretary to the Government of Mysore, Bangalore.

Letter Dated 20th January 1945 from Mr. William Nagy, Bangalore

WD 0726—GPB—25,000—15-9-44

stating that the land required by him is the land in Survey No 22 of Jannamana Village, Sagara and that the extent is roughly 8 acres.

2) Instructions by the Hon. P.W.D & Ind. (Dated 25th Jany 45) "This may be forwarded to D.C. Shimoga for his opinion and if the land could be given to the applicant"

Orbs.

30.1.45

2) The connected file obtained from the I. & C.Br. containing the original letter of Mr. William Nagy is put up for perusal.

3) It is seen from the correspondence that the intention is to start a private Limited Co. for the purpose of establishing a general purpose wood working company with a subscribed capital of Rs.2 lakhs, the entire amount being financed by Mr. Nagy and one Mr. Kapur. It is proposed to locate the factory about two furlongs from the railway station at Sagar and in this connection Mr. Nagy has requested that about 8 acres of Govt. waste land may be given to him.

4) A draft letter to the Residency is put up for orders. Under rule 439 (e) of the General Circulars and Standing Orders, the consent of the Crown Representative is required for the employment in Indian States of aliens (including Americans) in any capacity. In the present instance, as Mr. Nagy has only applied for permission to start a company and as there is no idea at present of employing him under Govt., the sanction of the Crown Representative does not seem to be called for.

5) If the draft letter to the Residency is approved, it will be issued and the file then passed on to Dev.Sectt.

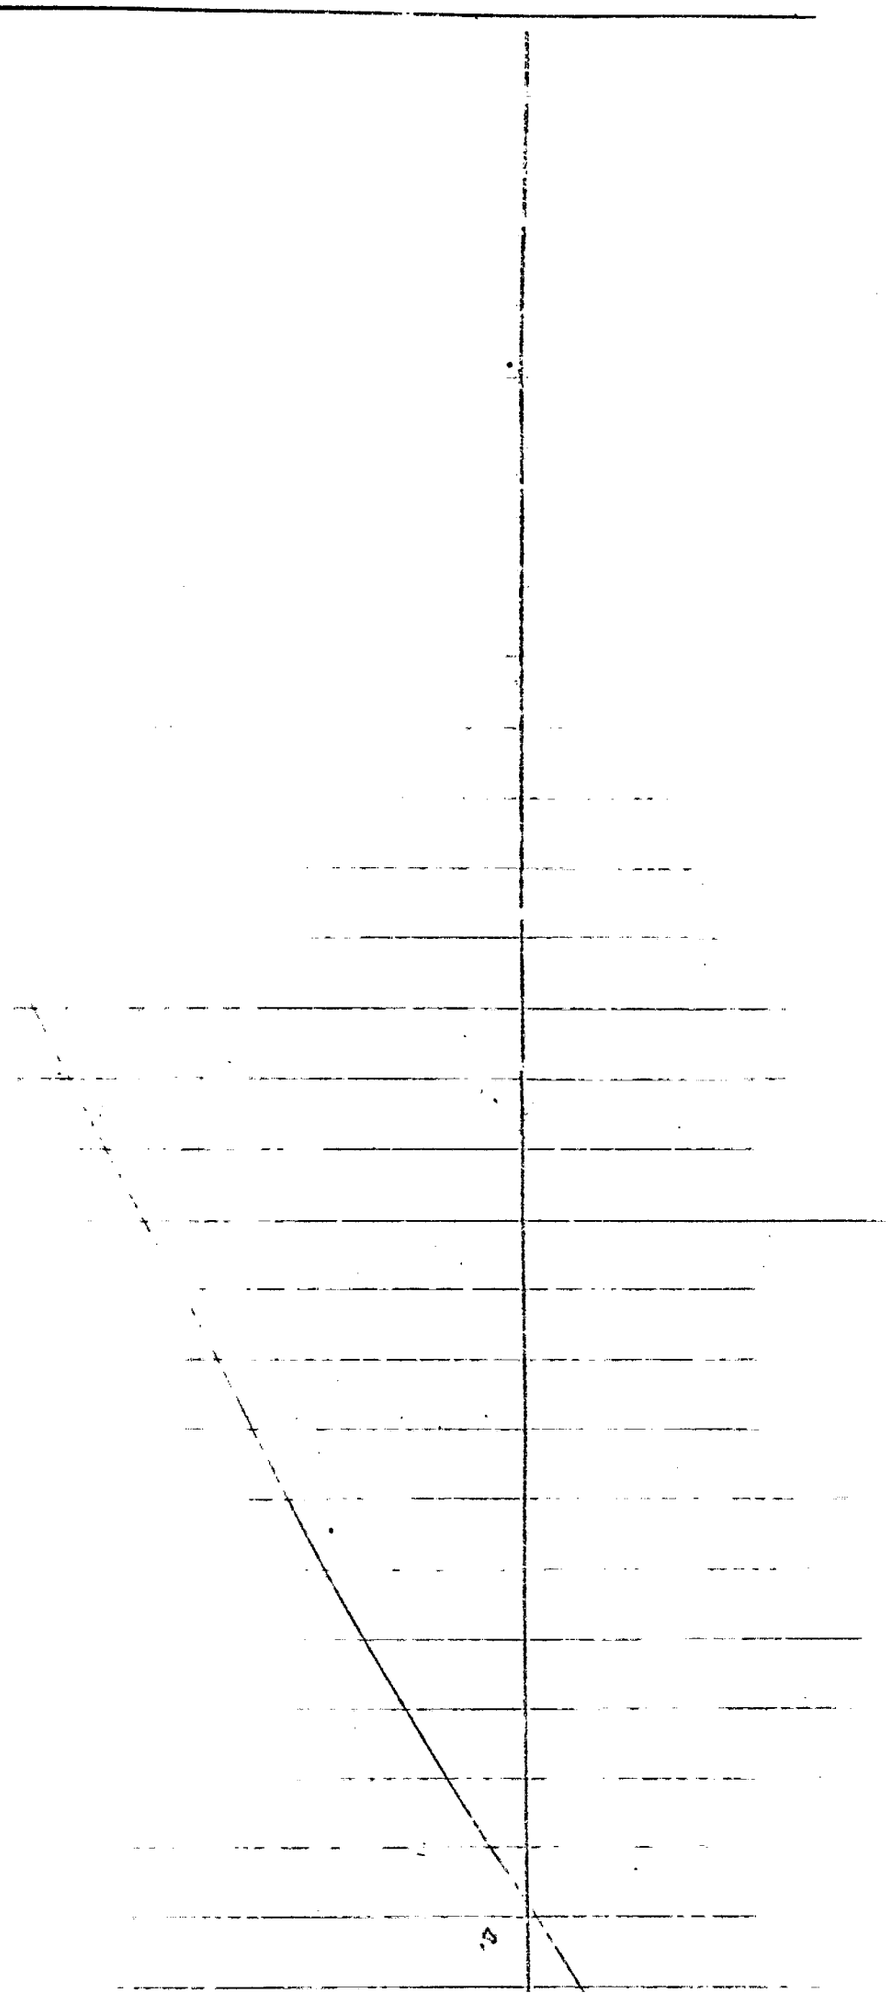
Re Nagy's proposal to erect a wood working, ~~near~~ Sugar.

C. F. 69]

Continuation Sheet. 7a File No. / Current No. 373 of 446 Page.



Mr Nagaraj's proposal to start a wood

1) letter no 4 dt 17th Jan '85 from Mr Nagaraj stating that he proposes to locate the factory at Sagar instead of Bhadravathi & that he wants 10 acres of land there and that conversion fine be waived

2) letter no 7 dt 20th Jan '85 from Mr Nagaraj that the land he requires is in survey no 22 of Sannamadra village, Sagar Taluk & that he requires 8 acres of land instead of 10 acres as part of it belongs to the Mysore State Rly

3) letter no EC. 1135-7/84-85 dt 27 1/2 Jan from the Commr for Development & plaing recommending the request of Mr Nagaraj for the starting of the factory.

32) ~~Hindi~~ Minutes of the Minister on the record of the letters read above

This may be forwarded to the D.C. Shimoga for his opinion & if the land could be given to the applicant"

33) Submd: Mr Nagaraj has stated that on the advice of the C.C.F he has proposed to locate the factory at Sagar instead of at Bhadravathi as originally proposed. On this connection, please see the U.O note of the C.C.F at paras 10-14 above

34) Mr Nagaraj has now requested for certain concessions:

1) He wants 8 acres of land in

Mr Nagy's proposal to start a wood works.

Survey no 22 of Samsamana village, Sagar Taluk & has requested

2) That the conversion fine may be waived.

3) A draft is put up ~~with~~ ~~in the first instance under regard to the~~ ~~above~~ accordingly the Mins' minute at para 32 above.

4) Orders are solicited on para 18 also

5) Dft letter to the DC Shimoga ~~and~~ for perusal before issue

6) The proposed company is to be a private limited one, to be financed by Mr Nagy & Mr Kapoor

7) The only concessions Mr Nagy has specifically asked for are regarding the grant of land near Sagar & the waiver or reduction of conversion fine. It is for consideration whether he should be asked to state definitely what other concessions or assistance, if any, he requires of Govt. or it be left to him to make such requests.

DEPY DIV DEPT
6. JAN. 1945
GOVT OF MYSORE

Att: Mr. J.M. Imam, B.A., B.L.

Enclosure (A) 1 copy of brochure.

Dear Sir,

1. The purpose of this letter is to place before you for consideration the company described in the attached brochure with the intent that it be formed and to begin operation.

2. The proposal generally is; to incorporate a private limited company for anauthorised capitalization of Rs.500,000 and a subscribed capitalization of Rs. 200,000 for the purpose of establishing a general purpose wood working company which will operate as a mass production finished articles concern using modern machines and modern methids.

It is proposed to begin with a single article and to mass produce it. When this has been thoroughly developed, it is proposed to develop another article until as much of this raw materials possibilities have been developed as the market will absorb.

3. The undersigned will be glad to discuss the proposed plan in detail with you personally or your colleagues at your convenience

4. May I hear from you as to when we may discuss this proposal and as to your opinion in this connection.

Yours truly,

LD/WN

William Nagy

FOREWORD.

The survey work for this proposal has taken place over the more than two and one half years that the author has lived and worked in India.

Over this period extensive travells and visits have been made to the major market areas as well as to the forest areas for familiarization generally with the variety and conditions to be expected in geography, climate and people.

In this time the author has had the pleasure of meeting a considerable number of prominent businessmen of India who have given encouragement and impetus to this proposal.

The more detailed the survey became the more it became clear that the proposal described was a sound and worthy one in any respect in which it is viewed.

It is with this in mind that it is presented.

PURPOSE

The purpose of this organisation basically is, as is with any other business organization, to make a profit from a sale but however, with modifications and limits.

It is not our purpose to establish a war born unsound organization that cannot and is not able to secure its place in the peace times to come. Nor is it the purpose to establish an industry founded on a basis that will contribute to unhealthful conditions of labor, and the usual small business inefficiencies.

As must be the aim of an industry that is to establish its dignity and respect both in labor and its market, it cannot build on an excess of profits small volume and low wages. Nor can the article that is turned out be the best for the price under these conditions. The methods, labor and machinery must be such that they are of the latest and best and most scientific; backed by a progressive and aggressive spirited management.

If this organisation is to prove a stable one , its business policies must be in keeping with those of the most modern, these are large volume, small unit profit, mass sales. And to do this it must bring with it the best and the latest machinery and the most modern methods.

Only such a modern organization reachs its basic purpose of making a profit and of meeting its social and economic purpose and obligation.

GENERAL

This organization proposes to operate a factory that will be capable of turning out finished consumer products from the raw material under a single roof.

With wood this is more important than it would be with other commodities. For the percentage of wastage even at its extreme minimum is a tremendous one especially in shipping the raw material both in weight and space. This is reflected in the price of the finished article. Hence, the location of the finished article manufacture in relation to the source of raw material must be as close as possible to afford utilizing this natural advantage to its fullest.

In addition at least 5 intermediate steps makes for a large accumulative profit at each step no matter how small each may be in itself. It is proposed to locate the factory close to an industrial area, transportation facilities and power supply. It is proposed to operate the factory along the most modern lines in a large building equipped with machines of latest design. In the beginning these machines will be primarily of general purpose which have been designed and are meant to be built in Mysore. As specialised machinery is required in the near future it is also planned to design and build these as well. For this reason as well as for others it is planned to accommodate a modern engineering department to keep abreast with the times in a scientific modern manner. It is expected that sufficient forest area will become available to enable the company to engage in its own logging, cutting, processing, manufacturing and selling to the final consumer. In this manner all middle men will be deleted with its attendent inefficiency.

Covernment Concessions .

This organization at this stage does not require nor does it seek special favours or concessions of any kind from the Covernment excepting a sympathetic attitude.

It is recognized that the performance of the organization remains to be proved both in results and its self reliant character.

It will in time be advantageous to acquire the usual rights that any organization of a similiar character would be entitled to.

During its formation and construction period in which priority and licensing would be established it would appear correct that it be classed as an essential war industry, since it is to be in this line that the beginning will be made.

It is contemplated that only such civilian work will be undertaken as will in no way interfere with this war work.

All concessions other than the one noted have been ommitted as a further means of expediting the procedureof incorporation and of beginning.

At a later date when the organization has proved its value the question of obtaining a lease on a section of forest from the Mysore Government will be taken up.

LOCATION

It is proposed to locate the factory between Bhadravati and Shimoga along the main highway. This will provide an excellent location with a view to transportation both from the source of raw material and of the finished product. It is eventually proposed to truck all finished articles by road to one of the ports on the Western Coast and from there to utilise water transportation. In addition adequate water is available for use as a storage medium and for whatever processing that may be found necessary. Power is available from adjacent lines. The quantity of 120 KWH per day that will be required is probably available.It is proposed, as soon as time will permit, to run a rail spur into the factory to enable both receipts and shipments to be made in an expeditious manner. Roads are available to haul timber from the forest area as well as to ship them by truck to the immediate market. It has been located here for two additional reasons. One is that in time it is proposed to utilise the steel to make metal fastenings used in wood work and to investigate the possibility of manufacturing tools that require wooden handles. Further, during the construction of the buildings steel will be required in fastenings as well as in reinforcements. Cement will also be required and since both of these articles are located in this vicinity the problem of building material so far as transportation is concerned will not be a great one.

As a part of the future business of the organization is based upon the development of efficient pattern making, it will be advantageous to be adjacent to one possible customer. This location is also advantageous from the point of availability of material for machinery manufacture. This will be developed and utilised to the fullest extent. It is also hoped that products associated with wood and utilising it to some extent will be developed to form finished products from both industries. Wood screws, hinges and metal fittings of all sorts are expected to be used in large quantities.

OPERATION

The best of plant and equipment and sound financing are not enough to make a factory run at all let alone run well. It must be operated by one who knowshow to operate it together with an aggressive determined spirit. And these same qualities must be found into the entire organization. Hand work while it had its place is no longer a basis for efficient industry. In order to utilise the efficiency of these machine made products the industry must be founded on a mass production basis and on volume manufacture.

The principle of modern selling with sales representation and advertising will be used in accordance with the best of methods. Recognition that a factory must be run on modern standards with the welfare of the workers taken into account is also a part of the plan.

It is proposed to start operating the company in a maximum time of two months after approval is granted. Since all the necessary engineering has been accomplished so far as the fundamental machines are concerned, and the building has been designed it is estimated that at the end of this period the plant can be in operation. In the mean time business contracts can be made and the necessary plans made to procure timber rights.

It is also proposed to set up an office in America through which we hope to obtain the latest data on this industry in combination with the Forest Research Laboratory.

PRODUCTS

A partial list of probable products that will be manufactured on a mass production basis is given below. It is intended that in the beginning only cut sizes of lumber will be marketed and that each article in turn will be investigated for its market ability. This has been taken as a basis for as much reason from a manufacturer's point of view as from the customer. The saving in transport facilities and the cost of transporting an article of which 1/2 to 3/4 will be wasted is obvious. But as important to the customer is the fact that no initial investment is required to convert this un-economical bulk into useable sizes. Nor is there the resultant inefficiency in operating a part time organization that can be handled better and cheaper at the source. This to the consumer is important and satisfactory only if the saving is passed on to him. And this point is exactly the one of the organization.

It should also be apparent as to what such a plan means in the saving in transport. Both avoidable weight and especially space can be reduced by one half to one third for each wagon.

After this basic plan has been well settled it is proposed to investigate and if found as satisfactory as the primary survey shows to manufacture the following:

1. Toys.
2. Railway sleepers.
3. Wooden Roof Trusses.
4. Government Orders.
5. Packing crates for industry.
6. Furniture - Office and home.

7. Standard window frames and doors.
8. Industrial floor blocks.
9. Bi-products of saw dust.
10. Charcoal.
11. Fire wood.
12. Country craft.
13. Railway coach.
14. Textile Bobbins.
15. Pencils.
16. Tool handles.
17. Export of rare woods.
18. Casting patterns.

PERSONAL QUALIFICATION.

An organization reflects its personnel and especially leaders. Hence, it is important to those concerned that its leaders be first technically qualified and second of such integrity that it is beyond question.

The author of this proposal is a graduate engineer in Aeronatics in America with nearly 7 years experience. Of these seven years 2½ have been spent in India at Hindustan Aircraft. During six of these years supervisory work has been done.

The time spent in India at Hindustan Aircraft has been in production work and of this the majority directly in manufacturing. This time has enabled the author to become acclimated to the country, people and methods. At the same time the necessary drive and conviction that industrial procedure can be modified and improved have not diminished.

There could be no better expression of faith than the fact that the author is willing to back this plan by accepting partial financing.

In this time the extensive touring in India has given the author the necessary perspective of the country and has enabled him to meet a large number of its business leaders from as far south as Madura and Calicut to as far north as Karachi and Allahabad. The fact that large part of the ground work has been done at personal expense of both time and money leaves little to be desired so far as ascertaining an expression of faith and of drive.

CONCLUSION

It is the author's hope that the proceeding description of the proposed plan will have had the necessary appeal to the imagination and logic to be persuasive.

The author believes that for this type of industry using the basic ideas presented, the opportune time to begin is now. For it is essential that as much as possible be accomplished during the time that a decided advantage can be gained by so doing.

It is hoped that the satisfactory establishment of this organization will be the impetus for the fulfilment of larger and better plans. Needless to say several of these plans are well in to the preliminary stage. But since the beginning must be made as simple and sound as possible, in keeping with the limitations imposed by the present conditions this has been chosen as the beginning.

January 17, 1945
Reference Letter No.4

Minister for Public Works

Att: Mr. I.J. Imam

OFFICE OF THE MINISTER
FOR PUBLIC WORKS
24 JAN. 1945
No. 1018

Dear Sir,

As supplementary to the original proposal of establishing a general purpose wood working factory I have been advised by Mr. Jabbar, Chief Conservator of Forests that, instead of locating the factory at Bhadravathi as had been planned originally, that it be located at Sagara, since a forest area could be leased to the factory adjacent to this area.

This is satisfactory, and it is therefore proposed to locate the factory on the land adjacent to the railroad beginning about 2 furlongs from the Railway station at Sagara and extending parallel to the rail road to the River. The attached sketch indicates this location.

It has become known that in the normal process of converting land to industrial uses that a so called conversion fine of two thousand to four thousand rupees per acre would be levied. As the area required is approximately 10 acres this fee would be disproportionate to the financial stucture of the Company.

Since this is Government waste land of no value agriculturally and since it is in an area deserving industrial development it is desired that this conversion fine be waived or that it be reduced to a nominal fee.

It is also understood that some question has arisen regarding the financing of the company. The financing is to be done by one Indian gentleman Mr.Kapur and myself for the time being. It is his intention to become a resident in Bangalore some time during the next month.

It is also the intention of the Company to become a private limited company in which case if additional capital is required it may be open to general subscription within the limits set on this type of company.

For the time being however it is felt that in order to avoid the delay and disadvantages encountered in other types of financing that the present arrangement remain.

Yours truly,

William Nagy

GOVERNMENT OF MYSORE

Telegram / phone

OFFICE OF

the Commissioner, Development & Planning, Bangalore.

No. E.C. 1357/44-45.
Encls.

Date 25th January 1945.

To

CHARLES E. NORONHA, ESQ., M.A.,
Secretary to Government,
Development Department,
BANGALORE.

Sir,

Subject: Starting of a Wood Working Factory at Sagar.

I have the honour to state that Mr. William Nagy, 9, South End Road, Basavanagudi, Bangalore, has given me a scheme for starting an Industry in Mysore to be called "INDUSTRY LIMITED" for the location of a factory at Sagar for the manufacture of certain heavy wooden articles like Railway Sleepers, Wooden Roof Trusses, Packing Crates, Standard window frames and doors, Floor blocks, and other wooden articles like Toys, Furniture, Bobbins, Tool Handles etc. He also proposes to trade in Charcoal and Firewood and take up the export of rear timbers.

There is a great need for such an Industry for the development of the Malnad and I think the Industry ought to be encouraged. It is proposed to be located in Sagar so that it may be as near as possible to the sea and also be on the rail-head for inland traffic.

He askes for certain concessions which are by no means unreasonable. He requests that it may be classed as an essential war industry. The supply of Railway Sleepers and Firewood and Charcoal for Bhadravati would certainly come under an essential war requirement.

He has subsequently selected some Government land near the Sagar Railway Station for the purpose of locating the Factory and requests that this may be given to him at a nominal upset price and that conversion fine be waived as it is not now agricultural land but only Government waste. This request is also reasonable considering the advisability of starting such an industry and that the land is now of practically no use. This enterprise will also be of great help in expediting the exploitation of the submergeable area near Madenur as the timber extracted therefrom will find a ready use and market.

I particularly welcome the idea of making Standard window frames and doors and Wooden roof trusses as they will be of great help in our Housing Scheme.

I recommend that the requests may favourably be considered.

I have the honour to be,
Sir,
Your most obedient servant,

COMMISSIONER,
Development and Planning.

MLB.

Subject: Description of a good working story set up.

I have the honour to state that I, [illegible], South [illegible] Road, Merryton-on-Sea, am going to be a scheme for [illegible] starting an industry in Lyport to be called "[illegible]" for the location of a story at Merry for the manufacture of certain heavy wooden articles like [illegible], doors, [illegible] frames, [illegible] tops, [illegible] boards with [illegible] and [illegible] etc. [illegible] Local [illegible] other [illegible] articles like toys, furniture, [illegible] and [illegible] etc. [illegible] also proposes to trade in the [illegible] imported and the export of [illegible].

[illegible] a [illegible] for [illegible] industry [illegible] - [illegible] to [illegible] start the industry [illegible] [illegible] is proposed to be located in [illegible] as possible to the [illegible] also be on the [illegible] traffic.

[illegible] for [illegible] [illegible] [illegible] [illegible] - [illegible]. [illegible] [illegible] [illegible] [illegible]

Copy of an extract from the proceedings of a meeting held on 15th June '45 of the Directors of Industrial Concerns.

7. Wood Works: The scheme put forward by Mr.William Nagy, production Engineer, Hindustan Aircraft Ltd., for the starting of a wood works Factory as a partnership concern at Sagar to manufacture standard door and window frames rafters etc., was discussed. It was thought that the scheme was a very good one, but it would be better if Mr. Nagy could get Mysoreans to finance him instead of the Bombay financier who was to be his partner. He was to be asked about this.

FOREWORD

The survey work for this proposal has taken place over the more than two and one half years that the author has lived and worked in India.

Over this period extensive travells and visits have been made to the major market areas as well as to the forest areas for familiarization generally with the variety and conditions to be expected in geography, climate and people.

In this time the author has had the pleasure of meeting a considerable number of prominent businessmen of India who have given encouragement and impetus to this proposal.

The more detailed the survey became the more it became clear that the proposal described was a sound and worthy one in any respect in which it is viewed.

It is with this in mind that it is presented.

PURPOSE

The purpose of this organization basically is, as is with any other business organization, to make a profit from a sale but however, with modification and limits.

It is not our purpose to establish a war born unsound organization that cannot and is not able to secure its place in the peace times to come. Nor is it the purpose to establish an industry founded on a basis that will contribute to un-healthful conditions of labor, and the usual small business inefficiencies.

As must be the aim of an industry that is to establish its dignity and respect both in labor and its market, it cannot build on an excess of profits small volume and low wages. Nor can the article that is turned out be the best for the price under these conditions. The methods, labor and machinery must be such that they are of the latest and best and most scientific; backed by a progressive and aggressive spirited management.

If this organization is to prove a stable one, its business policies must be inkeeping with those of the most modern, these are large volume, small unit profit, mass sales. And to do this it must bring with it the best and the latest machinery and the most modern methods.

Only such a modern organization reaches its basic purpose of making a profit and of meeting its social and economic purpose and obligation.

GENERAL

This organization proposes to operate a factory that will be capable of turning out finished consumer products from the raw material under a single roof.

With wood this is more important than it would be with other commodities. For the percentage of wastage even at its extreme minimum is a tremendous one especially in shipping the raw material both in weight and space. This is reflected in the price of the finished article. Hence, the location of the finished article manufacture in relation to the source of raw material must be as close as possible to afford utilising this natural advantage to its fullest.

In addition at least 5 intermediate steps makes for a large accumulative profit at each step no matter how small.each may be in itself. It is proposed to locate the factory close to an industrial area, transportation facilities and power supply. It is proposed to operate the factory along the most modern lines in a large building equipped with machines of latest design. In the beginning these machines will be primarily of general purpose which have been designed and are meant to be built in Mysore. As specialised machinery is required in the near future it is also planned to design and build these as well. For this reason as well as for others it is planned to accommodate a modern engineering department to keep abreast with the times in a scientific modern manner. It is expected that sufficient forest area will become available to enable the company to engage in its own logging, cutting, processing, manufacturing and selling to the final consumer. In this manner all middle men will be deleted with its attendent inefficiency.

GOVERNMENT CONCESSIONS

This organization at this stage does not require nor does it seek special favours or concessions of any kind from the Government excepting a sympathetic attitude.

It is recognized that the performance of the organization remains to be proved both in results and its self reliant character.

It will in time be advantageous to acquire the usual rights that any organization of a similiar character would be entitled to.

During its formation and construction period in which priority and licensing would be established it would appear correct that it be classed as an essential war industry, since it is to be in this line that the beginning will be made.

It is contemplated that only such civilian work will be undertaken as will in no way interfere with this war work.

All concessions other than the one noted have been ommitted as a further means of expediting the procedure of incorporation and of beginning.

At a later date when the organization has proved its value the question of obtaining a lease on a section of forest from the Mysore Government will be taken up.

LOCATION

It is proposed to locate the factory between Bhadravati and Shimoga along the main highway. This will provide an excellent location with a view to transportation both from the source of raw material and of the finished products. It is eventually proposed to truck all finished articles by road to one of the ports on the Western Coast and from there to utilise water transportation. In addition adequate water is available for use as a storage medium and for whatever processing that may be found necessary. Power is available from adjacent lines. The quantity of 120 KWH per day that will be required to run a rail spur into the factory to enable both receipts and shipment to be made in an expeditious manner. Roads are available to haul timber from the forest area as well as to ship them by truck to the immediate market. It has been located here for two additional reasons. One is that in time it is proposed to utilise the steel to make metal fastenings used in wood work and to investigate the possibility of manufacturing tools that require wooden handles. Further, during the construction of the building steel will be required in fastenings as well as reinforcements. Cement will also be required and since both of these articles are located in this vicinity the problem of building material so far as transportation is concerned will not be a great one.

As a part of the future business of the organization is based upon the development of efficient pattern making, it will be advantageous to be adjacent to one possible customer. This location is also advantageous from the point of availability of material for machinery manufacture. This will be developed and utilised to the fullest extent. It is also hoped that products associated with wood and utilising it

OPERATION

The best of plant and equipment and sound financing are not enough to make a factory run at all let alone run well. It must be operated by one who know how to operate it together with an aggressive determined spirit. And these same qualities must be found into the entire organization. Hand work while it had its place is no longer a basis for efficient industry. In order to utilise the efficiency of these machine made products the industry must be founded on a mass production basis and on volume manufacture.

The principle of modern selling with sales representation and advertising will be used in accordance with the best of methods. Recognition that a factory must be run on modern standards with the welfare of the workers taken into account is also a part of the plan.

It is proposed to start operating the company in a maximum time of two months after approval is granted. Since all the necessary engineering has been accomplished so far as the fundamental machines are concerned, and the building has been designed it is estimated that at the end of this period the plant can be in operation. In the meantime business contracts can be made and the necessary plans made to procure timber rights.

It is also proposed to set up an office in America through which we hope to obtain the latest data on this industry in combination with the Forest Research Laboratory.

PRODUCTS

A partial list of probable products that will be manufactured on a mass production basis is given below. It is intended that in the beginning only cut sizes of lumber will be marketed and that each article in turn will be investigated for its marketability. This has been taken as a basis for as much reason from a manufacture's point of view as from the customer. The saving in transport facilities and the cost of transporting an article of which 1/2 to 3/4 will be wasted is obvious. But as important to the customer is the fact that no initial investment is required to convert this uneconomical bulk into useable sizes. Nor is there the resultant inefficiency in operating the part time organization that can be handled better and cheaper at the source. This, to the consumer, is important and satisfactory only if the saving is passed on to him. And this point is exactly the one of the organization.

It should also be apparent as to what such a plan means in the saving in transport. Both avoidable weight and especially space can be reduced by one half to one third for each wagon.

After this basic plan has been well settled it is proposed to investigate and if found as satisfactory as the primary survey shows, to manufacture the following products:

1. Toys.
2. Railway sleepers.
3. Wooden roof trusses.
4. Government Orders.
5. Packing crates for industry.
6. Furniture - office and home.
7. Standard window frames and doors.

PERSONAL QUALIFICATIONS

An organization reflects its personnel and especially leaders. Hence, it is important to those concerned that its leaders be first technically qualified and second of such integrity that it is beyond question.

The author of this proposal is a graduate engineer in Aeronatics in America with nearly 7 years experience. Of these seven years 2½ have been spent in India at Hindustan Aircraft. During six of these years supervisory work has been done.

The time spent in India at Hindustan Aircraft has been in production work and of this the majority directly in manufacturing. This time has enabled the author to become acclimated to the country, people and methods. At the same time the necessary drive and conviction that industrial procedure can be modified and improved have not diminished.

There could be no better expression of faith than the fact that the author is willing to back this plan by accepting partial financing.

In this time the extensive touring in India has given the author the necessary perspective of the country and has enabled him to meet a large number of its business leaders from as far south as Madura and Calicut to as far north as Karachi and Allahabad. The fact that large part of the ground work has been done at personal expense of both time and money leaves little to be desired so far as ascertaining an expression of faith and of drive.

CONCLUSION

It is the author's hope that the proceeding description of the proposed plan will have had the necessary appeal to the imagination and logic to be persuasive.

The author believes that for this type of industry using the basic ideas presented, the opportune time to begin is now. For it is essential that as much as possible be accomplished during the time that a decided advantage can be gained by so doing.

It is hoped that the satisfactory establishment of this organization will be the impetus for the fulfilment of larger and better plans. Needless to say several of these plans are well in to the preliminary stage. But since the beginning must be made as simple and sound as possible, in keeping with the limitations imposed by the present conditions, this has been chosen as the beginning.

5-2-45

My dear Drake,

I am desired to acknowledge the receipt of your Secret D.O. letter No.F.5/45 dated the 20th Jany. 1945 and to state that one Mr. William Nagy, Production Engineer, Hindustan Aircraft, Bangalore, who is residing at No.9, South End Road, Basavangudi, has applied to this Government for permission to float a private Ltd. Company with an authorised capital of Rs.5 lakhs and a subscribed capital of Rs.2 lakhs for the purpose of establishing a general purpose wood working company with its headquarters located at about two furlongs from the railway station at Sagar (Shimoga District). He has also stated in this connection that an area of nearly 8 acres of Govt. waste land is likely to be required for constructing the factory. The request of Mr. Nagy is being examined by this Govt.

Yours sincerely,

WT 3/2/45

Chief Secy.

Reference Letter No.18

Mr. Noronha
Development Secretary

Dear Sir,

With further reference to classification as an essential war industry as noted in our original proposal submitted to the Government under the section of concessions, this is further desired in view of my conversation with Mr.Ranganathi Iyer, Director of Civil Supplies.

The essence of this conversation was that in order to obtain the necessary supplies for the factory and the building it would be necessary for the Government to express its opinion that this organization could be classed as an essential war industry. This would in fact be the case as the work to be undertaken would be the Government and military supplies of timber and timber products. The controlled articles that are required are electric motors, electric wirings, round steel rod for the building, asbestos roofing and cement.

In addition this classification is important personally to the undersigned as he is subject to military draft in [illegible] and unless this classification is obtained it is questionable that the deferred status for essential war work classification can continue.

It would therefore be appreciated if this classification could be assigned in not officially as an expression of opinion similar to that given by Mr.P.H.Krishna Rao.

Yours truly,
William Nagy

OFFICE OF
the Deputy Commissioner,
Shimoga District,
Shimoga,
Date 17th July 1945.

To

The Secretary to Government,
Development Department,
BANGALORE.

Sir,

Subject:- Mr. Nagy's request for land at Sagar for locating a Wood Works Industry.

With reference to your reminder letter No.9050/373-44-5 dated 29-6-45 on the above subject, I have the honour to state that Mr. William Nagy has applied for the grant of S.No.22 of Sannamane Village, Sagar Taluk. The land is classed as Kharab and measures 7 acres and 1 gunta. The Sagar Talaguppa Railway line passes through this land. As the Akarband has not yet been corrected, the exact extent occupied by the Railway line is not ascertainable. It is roughly calculated as 1 acre. The villagers have stated that men and cattle have also to pass through this land for going to the neighbouring lands or to the main road nearby and that the land might not be disposed of to any body. The Amildar, in submitting the records, has stated that the extent available in S.Nos.22 is insufficient for Mr. Nagy and has suggested that Mr. Nagy might purchase an extent of 6 acres and 9 guntas adjoining S.No.22.

2) Mr. Nagy was written to on 25-5-45, and requested to intimate his views in the matter. He did not reply this letter.

3) On 29-5-45, Mr. Nagy wrote from Sagar and requested me to intimate the stage at which the matter stood. He was intimated of the above facts and requested to express his opinion in the matter.

4) He has now replied stating that for the present, he is interested only in the purchase of S.No.22 referred to above, and that the

P.T.O.

extent available is sufficient.

5 I am taking further action to grant the land to Mr. Nagy, in consultation with the local officers.

I have the honour to be,
Sir,
Your most obedient servant,

For Deputy Commissioner,
Shimoga District.

Bangalore.

Dear sir,

In reply to your letter No.D.7214. I&C.373-44-8 dated 16th May please be advised that in accordance with paragraph 5 I am attaching herewith Blue Print of the area of forest that is required for leasing. The matter of concessions in this connection will be provided in due course mutually satisfactory to both Government and the Company. But first a general understanding is desired as to the fact that this area will be leased to the proposed Company provided that satisfactory terms are arranged mutually.

With regard to paragraph 4 I have received no further communication in this connection. But I have undertaken direct communication with the Deputy Commissioner of Shimoga District and he has made available this land. It is requested that information be forwarded whether or not the conversion fine may be waived in this connection as requested in my original letter on this matter.

Yours truly,

WILLIAM NAGY.

WD 04161—GPB—60,000—24-10 41

No.A5.Aln.15/44-45. Office of the Deputy Commissioner,
Shimoga District.
Dated, Shimoga, 6th October 1945.

To

The Secretary to Government,
Development Department,
Bangalore.

Sir,

Subject:- Grant of S.No.22 of Sannemane, Sagar Taluk to Mr.William Nagg for locating a wood work's Industry.

With reference to your letter No.D.1598/1&C373-44-9, dated 11-9-45 calling for a report on the above subject, I have the honour to state that an approximate extent of 3 acres 10 guntas out of S.No. 22 of Sannamane village, Sagar Taluk is available for being granted to Mr. Nagg. The Sub Division Officer, Sagar has opined that the land might be valued at Rs.100/- per acre. Ordinarily conversion fine at a rate not exceeding Rs.1000/- per acre is leviable on land of the kind as they are situated within a radius of 2 miles from the Sagar Railway Station. But by the time the records were ripe for orders, it was learnt that Mr. Nagg had left the place once for all to Calcutta. The Sub Division Officer, who was written to has submitted the letter received from the Manager of Mr.Nagg's concern at Sagar to the effect that he is unaware of the whereabouts of Mr. Nagg and that he is likely to return at the end of three months. If Mr. Nagg returns and presses for the grant of the land and its conversion to an Industrial purpose, I will address the Revenue Commissioner. In the meanwhile, I request that the correspondence on the subject may kindly be closed for the present.

I have the honour to be,
Sir,
Your most obedient servant,

for Deputy Commissioner,
Shimoga District.
